

Introduction to SQL

Paragraphs

- SQL (Structured Query Language) is a standard language for managing and querying relational databases.
- It allows users to retrieve, manipulate, and manage data stored in databases.

Basic Syntax

Paragraphs

- SQL statements are case-insensitive, but keywords are typically uppercase.
- A basic SQL statement starts with the SELECT, INSERT, UPDATE, or DELETE command.

Data Types

Paragraphs

- SQL supports various data types: INTEGER, VARCHAR, DATE, BOOLEAN, etc.
- Values are case-insensitive unless specified otherwise.

SELECT Statement

Paragraphs

- SELECT retrieves data from a database.
- The basic syntax is: SELECT column1, column2 FROM table;

Applications

Paragraphs

- SQL is used for data retrieval, insertion, deletion, and modification in relational databases.
- It is essential for working with databases in applications like CRM, ERP, and web platforms.
